

Environmental Safety and Energy Policy

In order to protect the natural environment and resources, care for employees and local residents, Eclat encourages all employees to participate and continuously improve to reduce environmental impact and provide a good working environment. We are committed to the operation of the environmental safety and energy management system through the following environmental safety and energy policies:

1. Comply with legal regulations and meet social expectations

Comply with or even exceed the relevant environmental safety and environmental laws or regulations to meet customer needs or local community expectations.

2. Reduce environmental impact

In order to strengthen the control and improvement of pollution sources, the principle of pollution prevention is achieved, and the impact on the environment during the operation process is reduced.

3. Intensive training, encourages all employees to participate

Establish environmental protection, energy conservation and risk management concepts for all employees through environmental safety and energy training and activities.

4. Implement daily management to improve environmental performance

We promise to regularly review and continuously improve management performance through the occupational safety and health management system with PDCA method.

5. Strengthen hazard prevention and create a safe environment

Implement risk assessment, reduce safety and health hazards, and create a safe and healthy working environment to prevent occupational injuries and diseases.

6. Avoid waste of resources and achieve sustainable business

Saving energy, water resources and other raw materials, responding to green procurement and process energy-saving design, reducing waste, wastewater discharge, energy saving and carbon reduction in the operation process .

7. Strengthen communication and promote working relationships

Encourage employees to provide advice, provide multiple communication channels, and continue to reduce barriers to migrant communication and ensure that Security-related information is open and transparent.
